# **KNOWLEDGE AND POWER FALL TOGETHER!**

**(Francis Bacon, 1561 - 1626)**

**About Francis Bacon alias Master Rakoczi / R.,  
about the working departments or also the "aspects" of the Solar Hierarchy  
and about the solar initiations!**

A short introduction by Martin Besecke - [www.martinbesecke.de](http://www.martinbesecke.de)

Francis Bacon, 1561 - 1626, statesman and philosopher, was or is in truth a Master of the so-called "Solar Hierarchy" and is called Master Rakoczi / R..

He is as well as the already mentioned Masters Kut Humi / K.H. and Djwal Khul / D.K. a Master of the 5th solar initiation.

Souls of this level of spiritual development no longer need an earthly life and are therefore no longer in the cycles of reincarnation, but in principle can manifest themselves physically anytime, anywhere, even in an incarnation, and at any time dissolve again as it were.

Master Rakoczi / R. works in the "working department" of the so-called "intelligence-aspect", to which belong the topics and tasks of the intellectual development of the human, politics / political system, society / social system / societal development and the sciences and thus also the knowledge acquisition and transfer.

While the Masters Kut Humi and Djwal Khul work in the "working department" of the so-called "love-wisdom-aspect", to which belong the topics and tasks of the general spiritual development of the human, body - soul - mind / spirit, love, health, nature / plants / animals as well as the arts and religions and Whose transmissions are mediated in the "Theosophy".

In the manifestation "Francis Bacon" He founded the "empiricism", in which, shown shortened, it is about that in the gaining of knowledge, also (metaphysical) awarenesses and thereby the spiritual functionings and mechanisms of action should be included.

As "Francis Bacon" He was the groundbreaker of the modern natural sciences as well as for the founding of today's social and human sciences.

His political work and explanations on the political and state system laid the foundation for the democratizing political system of "the liberalism".

And His remarks on the economic system, described and criticized even then the dominance of economic interests over the good of the whole.

The topics, tasks and work areas of the working departments of the "intelligence-aspect" and the "love-wisdom-aspect" are already briefly presented.

Overall, there are three working departments in the Solar Hierarchy for the planetary work. The first of these three departments is the working department of the so-called "will-aspect".

To him belong the topics and tasks of the so-called planetary supply and the planetary architecture as well as the planning and management of the karmic ways. - Who has to reincarnate where and why?

Very nice describe this work the native people, the ancient Indian tribes, the First Nations, when they talk about their habitat, their homeland: "Three rivers were laid there. They have negotiated with them and ordered them to provide water and food to the people who will (soon) settle here, with things needed for life! "

A part of the tasks is, so to speak, to manage the pressures and veins of the earth, so that the people keep protected as possible.

This work is extremely complex, because in this case also the karmic ways must be managed with.

Spiritually developed people who work in this working department have in their earthly lives i.a. the ability to pick up a stone and then tell the story of that stone, whether it's was walled in a wall of a house and what people then lived in this house and what happened with them. Helena P. Blavatsky for example works in the department of the "will-aspect" and had in her lifetime i.a. this ability.

And spiritually developed people who work in the department of the "intelligence-aspect" have i.a. the abilities to look into systems and organizations and to be able to say what level of development they have, what development they are going and why, whether they are e.g. to slip into the ideological or even fail, and to be able to see and name the backgrounds and tasks of the interpersonal encounters and interactions, including the abilities, inner structures and limits of the participants.

While spiritually developed people who work in the department of the "love-wisdom-aspect", i.a. have the abilities to see and read the aura and the astral body of the humans and to communicate with animals or trees or the ghosts of nature.

Franz Hartmann for example works in the department of the "love-wisdom-aspect".

And people who already have a "solar degree of initiation", have, so to speak, abilities from all three working departments.

A solar initiation one get not just someday, so to speak, automatically.

One have to go first a very long, conscious and consistent path of spiritual development over many earthly lives.

Once one have reached a specific level of development, one will be subjected to an intense scrutiny by the Masters of the Solar Hierarchy, whether one are worthy and, above all, capable in dealing with an initiation in a responsible manner.

In total, there are 7 degrees of initiation.

At each higher level of initiation, but especially at the first initiation, is given additional knowledge of the spiritual, that is, the universal modes of functioning of the things and contexts, which goes far beyond the previous, extremely laboriously elaborated knowledge. For the respective developments towards the first 4 initiations, one still needs earthly lives. From the 5th initiation one needs no more earthly life, the whole spiritual development is completely finished. From the 5th initiation one is a Master.

People with the 1st degree of initiation often do not know about their spiritual level, but some find out.

To the knowledge that is given to one at the first initiation belongs i.a. the knowledge of the karmic functionings and laws as well as the true causes of the different clinical pictures. Also, the own subtlety is greatly refined, which means a deeper access to the subtle levels and their information flows as well as into the astral worlds.

To the main spiritual tasks of the first-initiates belongs the depersonalization. This means that all neediness, sensitivities and affectivities as well as fears and egoisms should be completely overcome.

They are no longer concerned with the "I" and "I AM", but only with the "IT".

Therefore, the dealing with them is difficult for others, because they no longer to respond or to take into consideration the human neediness, feelings and sensitivities of others because they know about the particular entanglements until to the karmic consequences that result from these neediness and feelings and are not willing to enter this. They are only just about the maintaining of the spiritual cleanliness and integrity.

Likewise, they consciously do not engage in a couple-relationship because they no longer need all the themes, issues and conflicts which associated with the lead of the relationship as a necessary learning experience for their personal development and therefore to have a relationship, including having and raising children, no longer belong to their tasks, because they are done with the work on these issues and topics.

They also lead a rather modest life on a purely economic level, because, due to the work on the depersonalization, they knowingly no longer aspire to possession or wealth or a personal career success as such, because they are only concerned with the matter, that is, to the work on the good of the whole.

First-initiates have a very strong energetic charisma and presence, and are in groups or projects, through their spiritual knowledge, which is then always recognized, in a very natural way, directly and immediately at the management and executive level.

Most of the first-initiates tend, due to the work on the depersonalization, in the private life to be loners.

For the depersonalization one usually need one earthly life, some also need two.

Once the depersonalization has been successfully completed, one get the second initiation.

The first-initiates are already permanent members and employees in the Solar Hierarchy.

In the work for the people is their primary task to act as a teacher and advisor. Some of the first-initiates get from the Masters the direct task to educate, to accompany and to advise specific political or societal leaders. These "leaders" are always informed in advance, so that this cooperation as possible in any case to come about. The aim of this cooperation is a general advancement and progression as well as an imparting of knowledge that goes far beyond the knowledge that can be learned at universities. And so that this cooperation can also be successful and, above all, survive potential difficult phases, the Masters activate the universal love for this cooperation, which then flows between the "leader" and the teacher or the first-initiate.

Hereto an example: With Mahatma Gandhi, someone stepped forward in his time who has all the abilities and capabilities in his inner to be a real leader, a real positive role model in the sense of integrity and wisdom. And in this context he became aware he can only win the fight for independence against Great Britain if he can maintain the integrity. And he understood that he can only maintain the integrity if he can keep the peace. But in the self-reflection he had recognized that he was not able to keep the peace from his very inner. So he was sent from the Solar Hierarchy to a spiritual teacher, a first-initiate who works in the department of the love-wisdom-aspect, to learn everything about integrity and keeping peace, until he was able to keep the peace himself from his whole inner. This education took several years and only then did he move into the fight for independence as a leader.

This example shows that such education and cooperation is absolutely necessary for a real positive further development in the sense for the good of the whole.

The second-initiates always go into the public at some point. They are leaders and the people join and follow this leaders in a very natural way. Their great ability and strength lies in being able to put specific topics on the agenda, which then will never disappear from the agenda again. Even if these topics should need many decades to be resolved, they never disappear from the agenda again.

Not every leader is also a second-initiate! Martin Luther King Jr. for example was a second-initiate who works in the department of the intelligence-aspect, but Mahatma Gandhi, Nelson Mandela, Pope John Paul II (also known as Pope Wojtyla), Mother Theresa, Rosa Luxemburg, Abraham Lincoln or John F. "Jack" Kennedy had no degree of solar initiation. As of 2020, there is no second-initiate in an active work and role in the world, but some have already reincarnated, but they are still in toddler age.

One has reincarnated in Germany, he announced himself before his birth, and was only 4 years old in 2020. It will therefore take at least 25 years before he will actively go into the public. He works in the department of the love-wisdom-aspect, which means that he will go into the direct work with the people.

To the main spiritual tasks of the second-initiates belongs the cooperation and teamwork with highly diverse of types, characters and inner levels of development. This can only work if one can love the people unconditionally. And accordingly, to the spiritual tasks of the second-initiates belongs all people in the world, and that really means everyone, to be able to love unconditionally from the whole inner, which is much more difficult in the practice than one would like to believe in the abstract.

Some second-initiates enter into a couple-relationship again. However, this relationship is no longer based on the usual learning and development topics, but only on the joint work on the common cause, and because together one can bring much more strength into the things than each individual could ever do alone.

Children can also emerge from this couple-relationship again, but does not have to.

The second-initiates are extremely dangerous to the existing system due to their knowledge, skills, effectualness and impact in terms of the spiritual integrity, which is why they often die prematurely, which means that they usually fall victim to a murder attack.

The second-initiates always know about it in advance, but what they don't care about! Because this is where the always asked question arises when it comes to universal projects for the good of the whole: Are you also ready to let your life for the right thing and the necessary?

However, as I said, this question no longer arises for the second-initiates because they have already completed the depersonalization and as a result they are no longer concerned with their small, personal life, but only with the big whole.

The third- and fourth-initiates are again working in the background, and here on the really big universal projects that usually take many, many decades until possibly centuries. For example, a group of third- and fourth-initiates has been working on it for several decades to relocate the capital of the USA from Washington D.C. to New York, which means a very, very complex and lengthy job.

One have to know about that due to the combination of cosmic rays that concentrates and affects on the USA, the true capital of the USA is New York and not Washington D.C.. And in order to be able to develop the universal tasks resulting from this combination of cosmic rays in a positive way and then of course also to practice them in a positive way, it is absolutely necessary to relocate the capital of the USA to New York.

And the fourth-initiates are already in the underlying entitlement for the Master.
